SIL SG102-10   Service Information Letter
SG102 AHRS

Date: October 15, 2014
Regarding: SG102 AHRS Software Release 1.61
SIL Revision: A (Initial)

Reason

This Service Information Letter is informational only. No action is required.

An issue affecting SG102 internal calibration during the production process was reported. Units presently in service are not affected.

Applicability

Sandel Model SG102 - part number SG102-X00 with MOD 2
Sandel Model SG102/D - part number SG102-X50

Description

SG102 software was revised to version 1.61 for improved manufacturing yield and incorporated into current production. Pilot operation is unchanged.

Field calibration: SG102 field calibration software has been updated to version 2.80. This version or later is required for calibrating new installations with SG102 software version 1.61.

Note regarding spares: SG102 software version 1.61 is backward compatible with prior field calibrations in existing installations with SG102 software version 1.26 or later.

Compliance

Not required for existing installations. Software version 1.61 is not field loadable.

Warranty Reimbursement

N/A

Manpower

N/A

Approval

This modification does not affect the original approval.
